FINAL ACTION

1. Amendment A, received on 6/05/2006, has been entered into record. In this amendment, claim 3 has been added.
2. Claims 1-3 are now pending.

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Bakhtiari et al. (US Patent No. 5,886,534 and Bakhtiari hereinafter).
5. As to claims 1 and 2, Bakhtiari discloses an apparatus and method of generation and homodyne detection comprising:

providing electrical paths each having an equal value, the electrical paths between a shunt arm in a waveguide T- connection (i.e. matched hybrid coupler) and a generation diode in one collinear arm [col. 6, lines 51-60] and a detection diode in another collinear arm [col. 6, lines 60-66] such that signals from a single microwave antenna that both radiates

to and receives signals reflected from an inspected object are used for inspection (Figs. 1 and 2; col. 4, lines 56-58 and 65-67).

6. As to claim 3, Bakhtiari discloses an apparatus and method of generation and homodyne detection comprising:

Where signals from the single microwave antenna are received by the waveguide T-connection (i.e. matched hybrid coupler) [col. 6, lines 54-58].

Response to Arguments

7. Applicant's arguments filed 6/05/06 have been fully considered but they are not deemed persuasive.

8. In the remarks, applicant argues in substance that:

(1) Bakhtiari fails to teach or suggest, "signals from a single microwave antenna that both radiates to and receives signals reflected from an inspected object are used for inspection".

9. Examiner respectfully traverse applicant's remarks:

- a. As to point (1), see paragraphs above, Bakhtiari discloses such that signals from a single microwave antenna that both radiates to and receives signals reflected from an inspected object are used for inspection (Figs. 1 and 2; col. 4, lines 56-58 and 65-67).

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
